The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This action is in response to applicant's amendment received on 13 November 2006.

Response to Amendment

- 1. The declaration under 37 CFR 1.132 filed 13 November 2006 is sufficient to overcome the rejection of Claims 83-90 based upon 35 U.S.C. 102(e).
- 2. However, it is unclear in the declaration of Todd A. Berg as to who the inventors are in the '036 patent (the inventor Jon St. Germain was dropped out), since "anything shown in the '036 patent [the prior art used by the examiner to reject the claims under 35 U.S.C. 102(e)] that is claimed in the '213 application [the present application] was derived from the inventors named on the '721 application [the parent of the '036 patent]," as seen on lines 4-8, page 3 of the declaration received on 13 November 2006. The examiner requests the applicant provide clarification as to which inventors contributed to the claims of the present application '213.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 83, 85, and 87-90 are rejected under 35 U.S.C. 102(b) as being anticipated by **Kaster** (U.S. Patent No. **5,234,447**).

Application/Control Number: 10/637,213

Art Unit: 3734

Kaster discloses a connector for use in making an artificial, fluid-tight, Claim 83: hollow, annular connection between an end portion of a tubular graft conduit and a side wall of a tubular body conduit in a patient via an artificially created aperture in the side wall of the tubular body conduit so that the tubular graft conduit extends from the tubular body conduit outside of the tubular body conduit and the patient's body fluid can flow between lumens of the tubular graft conduit and the tubular body conduit via the connection, the connector comprising a structure 12 which is annularly continuous and configured for disposition annularly around the outside of the tubular graft conduit, a plurality of first members 43 and a plurality of second members 44 extending from the structure in an annular array which is substantially concentric with the structure, the first and second members being resiliently biased to extend substantially radially out from the structure and being elastically deflectable substantially parallel to a central longitudinal axis of the structure, the first members being configured to pass through the side wall of the tubular graft conduit at respective locations that are spaced from one another around the side wall of the tubular graft conduit; and the first and second members being further configured to reach respective locations on the side wall of the tubular body conduit that are spaced annularly around the aperture when the connector is in use and the first and second members are extending substantially radially out from the structure (Figures 10, 14-19).

<u>Claim 84</u>: Kaster discloses the first **43** and second **44** members extending from respective first and second axially spaced portions of the structure, in that the edges of **46** are axially spaced (Figure 10).

Application/Control Number: 10/637,213

Art Unit: 3734

<u>Claim 85</u>: Kaster discloses when the first **43** and second **44** members are being deflected substantially parallel to the central longitudinal axis of the structure, they extend in respective opposite directions away from the structure (Figures 14-19).

Claim 87: Kaster discloses the first 43 and second 44 members being further configured for disposition on respective opposite sides of the side wall of the tubular body conduit when the connector is in use and the first and second members are extending substantially radially out from the structure (Figures 14-19).

<u>Claims 88-89</u>: Kaster discloses the structure being configured for annular and axial flexibility (Figures 10, 14-19).

<u>Claim 90</u>: Kaster discloses the structure and the first and second members being all one piece (Figure 8).

Claim Rejections - 35 USC § 103

5. Claim 86 is rejected under 35 U.S.C. 103(a) as being unpatentable over **Kaster** (U.S. Patent No. **5,234,447**).

<u>Claim 86</u>: Berg et al. discloses the claimed device except for the connector comprising nitinol. It would have been obvious to one of ordinary skill in the art at the time of invention to provide nitinol as a material for the connector since nitinol is well known for its compatibility with the body.

Application/Control Number: 10/637,213

Art Unit: 3734

4 : . 3

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Diane Yabut whose telephone number is (571) 272-6831. The examiner can normally be reached on M-F: 9AM-4PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Hayes can be reached on (571) 272-4959. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
